

COVID-19 Extraordinary Measures in place for a safe environment

Because we are a private school and an essential service, we've been operating our state-of-the-art classrooms and facilities for months during COVID with protocols in place to ensure a safe environment for our academics.

Our protocols are effective and they're working because they are being followed. Provincial Health Officer, Dr. Bonnie Henry, says that "the data so far suggests schools are a 'very safe' place to be during the pandemic. When the safety protocols that are in place in schools are followed, it is a very safe environment and transmission is very unlikely".

The small class sizes at CEFA make this even more of a reality. In addition to our own CEFA protocols, both BC and Alberta provincial guidelines are also being observed, respectively.

All of our CEFA locations have been adhering to strict cleaning and disinfecting actions within the school to prevent communicable disease and will carry on doing so.

Masks on Staff:

- Teachers are required to wear masks at all times when interacting with other teachers, staff and parents. They are also required to wear masks while they are outside of the classroom (but inside the school). This includes handling/serving food, changing diapers, etc.
- While not a requirement, we recommend teachers continue to wear masks in their classrooms during usually scheduled curriculum time. (Masks are not required in the classroom as teachers have the opportunity to manage adequate social distance between a variety of areas within the classroom).
- Chefs are required to wear a mask at all times while preparing, delivering and serving food. They are also required to wear a mask when interacting with teachers, staff or students.

School Tours:

Schools will conduct virtual tours or after-hours tours to support no parents in the schools when children and teachers are present.

Hours:

All CEFA schools are open during regular operating hours.

Drop off and Pick up:

Out of an abundance of caution, each school is continuing with their existing COVID-19 drop off and pick up protocols. Parents/Guardians must also confirm the following at drop off:

- 1) In the child's household, no one has returned from international travel in the past 14 days;
- 2) My child does not show any flu/cold-like symptoms today;
- 3) No one in my child's household, including my child, has been identified by Public Health as a close contact of a confirmed case of COVID-19;
- 4) If my child develops flu/cold-like symptoms while attending CEFA, I will pick up my child promptly, and I will keep my child at home until he/she has been assessed by a health care provider to exclude COVID-19 or other infectious diseases, AND their symptoms have resolved.

Additional Information:

In keeping with the direction of the Health Authority, we will continue to minimize the number of additional adults entering the school and strive to minimize the number of different staff that interact with the same children throughout the day. To accomplish this, where possible, teachers will no longer be changing classrooms for co-curricular and co-curricular will be taught by your child's current classroom teachers. We thank you for helping us to avoid infection and control exposure at the schools by staying home when ill, abiding physical distancing codes, minimizing physical contact with others, and complying with recommended hygiene practices, such as regular handwashing and not touching your face.

Parent Access:

It is fully understood that parents have the legal right to see and have access to their children. At CEFA, we fully support this. We would never impede this from happening. However, we still need to ensure this is conducted in the safest manner possible. Until further notice, there will be no parents allowed beyond the foyer doors (with the exception of Gradual Entry).

Gradual Entry:

Understanding and recognizing that this will be somewhat uncomfortable to parents, the proposal is that all parents would have to complete preliminary health screening checks and questionnaires prior to entry.

- Masks will be mandatory as will the use of hand sanitizer upon entry.
- Gradual entry would be permitted on the child's first day.
- There will be a 1-hour limit and only 1 parent (adult) will be allowed to be present.
- For children under 36 months, Gradual Entry will be allowed inside the school.
- For children over 36 months, Gradual Entry will occur on the playground.

Childcare-Based Control Measures

Stay home when sick

All children and staff with common cold, influenza, COVID-19, or other respiratory diseases must stay home and self-isolate.

Hand Hygiene

Everyone should wash their hands more often!

Thorough hand washing with plain soap and water for at least 20 seconds is the most effective way to reduce the spread of illnesses.

Respiratory & Personal Hygiene

- Cover your coughs.
- Do not touch your face.
- No sharing of food, drinks or personal items.

Physical Distancing & Minimizing Physical Contact

- Spread children out to different areas
- Take them outside more often
- Stagger lunch times. Incorporate individual activities.
- Remind children, "Hands to Yourself!".

Cleaning & Disinfection

- Clean & disinfect frequently touched surfaces at least twice a day
- General cleaning of the centre should occur at least once a day
- Use common cleaning & disinfectant products

Child care safety guidance for parents

Why are parents encouraged to return their child to child care settings?

- ✓ *Child care settings have many benefits, including: spaces for healthy eating, exercise, social and emotional development and connecting with others.*
- ✓ *These benefits help with the physical and mental well-being of children.*
- ✓ *There are no extra risks in child cares than in other public spaces.*
- ✓ *Children are less likely than adults to catch or spread COVID-19*
- ✓ *Continuing child care operations gives access to child care for parents who need to work.*

What's the risk of COVID-19 for young children?

Very few children get sick from COVID-19. In BC, children have had a much lower rate of COVID-19 infection than adults. If children do get sick with COVID-19, they have mild symptoms. Parents should focus on preventing the spread of COVID-19 between adults.

Some children may have a higher chance of more serious symptoms if they get COVID-19. This includes children under 1 year of age, those with weakened immune systems and those with pre-existing lung conditions. Check with your healthcare provider if you have concerns.

You can learn more about COVID-19 at bccdc.ca/covid19. You can check your symptoms using the self-assessment tool at bc.thrive.health.

How can I protect my child(ren) and others from COVID-19?

If your child is healthy and not showing symptoms, it is your choice to send them to a child care setting. All child care settings have put measures in place to help reduce the spread of the virus. You can protect your loved ones and others by following the guidelines below.

Keep your child home if they are sick

- Check in with your child(ren) daily to see if they have COVID-19 symptoms.
- If they have symptoms: (a) do not send them to child care; (b) get them tested for COVID-19.
- Be aware of common COVID-19 symptoms. Teach your children about them if they are old enough to understand.
- If a parent is sick, but does not have COVID-19: their child can be sent to child care if the child does not have symptoms
- If a parent has COVID-19, their child cannot go to child care until allowed by public health

Practice prevention before and after child care

- Have everyone wash their hands before they leave for child care and after they get home.
- When dropping off and picking up children, adults should keep 2 metres from other adults not in their own household.
- Drop off your child(ren) at drop-off times assigned by staff. Avoid going into the child care setting if possible.
- Clean all items the child takes to child care, (e.g., toys, backpacks, bottles, sippy cups and lunch containers) before and after child care.

Outside of the child care setting:

- Follow all guidance from public health.
- Limit play dates to the same children as much as possible.

Teach children about prevention

- Wash hands often, including before and after they play, go outside, eat, use the washroom or touch shared things like toys.
- Be aware that some hand sanitizers are not safe for infants, children and pregnant or breastfeeding women. Use an alcohol-based hand sanitizer that is approved by Health Canada. Read labels carefully.
- Encourage children to avoid physical contact. This is more important than keeping 2 metres apart
- Teach kids about keeping their hands below their shoulders, so they don't touch their face.
- Cover coughs and sneezes with elbow/tissue.
- Put tissues straight in the garbage.
- Masks are not recommended for any children in child care settings. Children under two years of age should not wear masks. For children over two years of age, masks may lead to increased touching of the face. Some parents may choose to have their older children wear a non-medical mask.
- Avoid sharing food, drinks, soothers, bottles, sippy cups, toothbrushes and other personal items.

Be open and honest with kids and teens

- Listen to children who might be worried about going back to child care
- Let them ask questions
- Tell children what their child care setting does to help keep them safe
- Maintain familiar activities like mealtimes and outdoor exercise
- Focus on positive behaviours and acknowledge/give kudos to children for their efforts when they follow guidelines, even if they have to be reminded
- Help children realize that they can do a lot to protect themselves and others, such as washing their hands
