

CEFA® Minis at Surrey – Cloverdale

With **CEFA Minis**, children get the benefits of play plus Early Learning taught in a **½ day morning format**. CEFA Minis is **the most sophisticated pre-k half-day offering available**, designed to give your child access to our world-class curriculum and the experience of highly trained teachers while giving you the convenience that you need.

Early education matters.

What you give your child by enrolling them at CEFA Minis is much more than a magical place to be. CEFA Minis helps create a strong foundation for learning today and for success later in life. Nearly 90% of brain growth takes place between the ages of 1 and 5, when 700 new neural connections are formed every second. These are the connections that build the foundation of a person's brain architecture — a foundation upon which all later learning, behaviour, and health depend.

Children need more than care to thrive.

After the age of five, the brain goes through a selective pruning process, eliminating neurons that haven't been used or made any connections. It's why Early Learning is so important, and it's why the connections that children make before five can have a positive and lifelong impact. Benefits of Early Learning include higher IQ, higher achievement levels, and even higher salaries as adults.
